COURSE DIRECTOR

CARLO FABBRI

*Director of Gastroenterology and Digestive Endoscopy Unit
Ospedale Morgagni Pierantoni, Forlì - Ospedale Bufalini, Cesena*

SCIENTIFIC COMMITTEE

**CECILIA BINDA, CHIARA COLUCCIO, STEFANO FABBRI, GIULIA GIBIINO,
PAOLO GIUFFRIDA, CARLO JUNG, ELISA LIVERANI, MONICA SBRANCIA**

*Gastroenterology and Digestive Endoscopy Unit
Ospedale Morgagni Pierantoni, Forlì - Ospedale Bufalini, Cesena*

As its name suggests, Pictures 2025 aims to generate a beneficial full picture of different gastrointestinal diagnostic and treatment possibilities by bringing together all those involved to share their experience and ideas in educational meetings. Digestive endoscopy is the cornerstone of the diagnosis and treatment of gastrointestinal diseases; successful digestive endoscopy requires radiologists, surgeons, oncologists, biologists and pathologists to work together as a tight team. An ongoing, well-coordinated interaction and consultation between those involved results in a highly effective exchange of information and viewpoints. This multidisciplinary approach is essential for the optimal achievement of diagnostic and therapeutic targets. The purpose of Pictures 2025 is to facilitate this crucial approach.

Appropriate prescribing and high-quality endoscopy are essential elements of our diagnostic and therapeutic pathways. At the same time, the choice of high-cost techniques as well as expensive and highly specific devices requires constant updating. Financial sustainability and the impact on the environment are other crucial elements in the management of high-quality endoscopy. Therefore, each procedure to date should be carefully evaluated and fully integrated into treatment pathways, considering all the perspectives of each specialist in charge. In short, we believe Pictures 2025 provides a very special opportunity for all clinical and nursing staff involved in the management of gastrointestinal diseases to interact and exchange information and viewpoints so as to maximise the benefit of each person's experience for the good of the whole team.

10:30 Opening and Welcome

I SESSION

11:00 **DYSMETABOLIC DISORDERS**

- MDT Clinical Case
- From NAFLD to MASLD: new definitions and diagnostic criteria
- Non-invasive tools for the evaluation of hepatic steatosis and fibrosis
- EUS-guided approaches to hepatic diseases: the endo-hepatology concept
- Bariatric Endoscopy as first line treatment: state of the art and future perspectives
- Interview The microbiome clinic: models for faecal microbiota transplantation
- Experts' insights

13:00 Lunch break

II SESSION

14:00 **PATHOLOGY AND BEYONDS**

- MDT Clinical Case
- Up-to-date in gastric precancerous conditions and lesions
- Standards in histological report after endoscopic curative treatments of GI lesions
- Insights in the precancerosis of the pancreas
- The role of molecular biology and pre-clinical models in GI tumors

III SESSION

15:30 **PANCREATOBILIARY DISEASES PART 1**

- Tandem Talk Warnings in Pancreatic Diseases: needs and new tasks of the scientific community. The UEG & EPC point of view
- Differential diagnosis in benign pancreatic diseases
- Pancreatic cysts: the recipe for the follow-up
- Chronic pancreatitis: from conservative treatments to surgery
- State of the art and future perspectives in cholangiopancreatography in pancreatobiliary diseases
- Interview Parenchyma-sparing surgery: for who and how?
- Experts' insights

17:30 **SYMPOSIUM - POINTS OF VIEW**

FRIDAY, OCTOBER 17th

I SESSION

08:30 **INFLAMMATORY BOWEL DISEASES**

- MDT Clinical Case
- New insights in disease remission in IBD
- Endoscopic evaluation of IBD severity: standards and future perspectives
- AI in Inflammatory Bowel Disease
- Small bowel evaluation in IBD: the role capsule endoscopy and enteroscopy
- How to manage colonic lesions in IBD
- Experts' insights

II SESSION

11:00 **PANCREATOBILIARY DISEASES PART 2**

- MDT Clinical Case
- Standard requirements for an adequate staging in pancreatic cancer
- Pancreatic surgery for pancreatic adenocarcinoma: for who and how?
- Biliary drainage in resectable patients. Still an issue?
- Standards requirement for an adequate pathological report: from biopsy to surgical specimen
- Locoregional treatments for pancreatic lesions
- Controversies in oncological treatment of pancreatic neoplasia
- Experts' insights

13:00 Lunch break

III SESSION

14:00 **PALLIATION IN GI MALIGNANCIES**

- MDT Clinical Case
- The management of pain in oncologic patients
- Nutritional support in oncologic patient
- How to approach bleeding GI lesions on patients with advanced oncological diseases
- The management of Gastric Outlet Obstruction
- Management of patient with colorectal-occlusion in patients with advanced oncological diseases
- Experts' insights

IV SESSION

15:45 **MANAGEMENT OF COMPLICATIONS**

- MDT Clinical Case
- How to face adverse events in endoluminal interventional endoscopy
- How to face adverse events in biliopancreatic endoscopy
- Endoscopic management of post-surgical leak
- Experts' insights

GENERAL INFORMATION

CONFERENCE SITE

AUDITORIUM EX CHIESA SAN GIACOMO

Piazza Guido da Montefeltro 8 - 47121 Forlì (FC)

REGISTRATION

Participation in the conference is free of charge.

Registration can be made online at the following website www.adbcongressi.it (CALENDARIO EVENTI) or by framing the QR code.

ITALIAN CME ACCREDITATION

CME accreditation for **Physicians, Biologists, Nurses** and **Radiology Technicians** will be requested.

Certificates of granted credits will be sent by e-mail to those who have attended the whole conference and filled in all relevant documents.

ATTENDANCE CERTIFICATES

Attendance Certificates will be made out upon request to all Participants at the end of the conference.

ORGANIZING SECRETARIAT
